** The 2006 Applicant Equity Census results are not available for publication. Due to an administrative oversight, the 2006 Census for applicants to undergraduate programs was distributed to applicants at the end of the admission cycle, after offers of admission had been sent out. The late distribution resulted in a low response rate (27.1%) and there is a strong basis on which to suspect that the responses were not random and could have been influenced by the acceptance information. Graduate numbers, while not similarly affected, have been suppressed. Law and Education were first surveyed in 2007.

** The 2006 Applicant Equity Census results are not available for publication. Due to an administrative oversight, the 2006 Census for applicants to undergraduate programs was distributed to applicants at the end of the admission cycle, after offers of admission had been sent out. The late distribution resulted in a low response rate (27.1%) and there is a strong basis on which to suspect that the responses were not random and could have been influenced by the acceptance information. Graduate numbers, while not similarly affected, have been suppressed. Law and Education were first surveyed in 2007.
