Overview

The School of Kinesiology and Health Studies offers a range of Program and Plan options to students in Arts and Science:

The **Kinesiology Specialization** Plan is a multi-disciplinary program that focuses on human movement in the applied exercise-science fields of study such as biomechanics, ergonomics, exercise physiology, and physical activity epidemiology. While the Plan is primarily science-based, students also learn about human movement in the context of exercise and sport psychology, health promotion, and socio-cultural studies of sport, the body, and physical activity. The B.Sc.(Hons.) Kinesiology Plan has been designed to meet the minimum accreditation standards for Kinesiology programs accredited by the Canadian Council of University Physical Education and Kinesiology Administrators (CCUPEKA). Admission to the Kinesiology Specialization Plan, leading to a Bachelor of Science (Honours) degree, is by direct-entry from high school.

The **Health Studies** Plan is a social science concentration that strives to understand the complex factors that influence physical, mental and social health and well-being. Drawing largely from social science disciplines, students learn about the social determinants of health, approaches to health promotion, health policy, health behaviour change, epidemiology, and program planning and evaluation. Students also explore socio-cultural studies of the body and health to think critically about health in relation to social justice and systems of power and oppression.
