

RISK POLICY AND REGULATION - GRADUATE DIPLOMA

NOTE: This program is currently not accepting new students.

The Graduate Diploma in Risk Policy and Regulation (RPRD) is a four-month program unique in Canada.

To be eligible to be considered for admission, students are required to have at least a B+ in a Master's degree in Economics (MA), a Master's in Financial Economics (MFE), or equivalent qualification.

The courses in this diploma will also be open to doctoral students in the Department of Economics and thus the diploma serves a secondary purpose: to introduce doctoral students to the study of financial risk and policy. It will comprise four compulsory courses:

1. RPRD 801 Risk Management Theory and Applications
2. RPRD 802 Financial Institutions Theory and Practice
3. RPRD 803 Financial Regulation
4. RPRD 804 Advanced Topics in Risk Management and Regulation

Course evaluation will be based on projects, case study analysis, assignments, presentations and examinations. This is a course-based diploma and, therefore, a dissertation or major research paper is not required.
