Your Future Awaits at Queen's

Choosing a university is about more than selecting a program. It's about finding a community that will challenge you, support you, and prepare you to make an impact.

Connected Learning. Real Opportunities.

At Queen's, you'll learn in an environment where meaningful connections matter. Work alongside professors, researchers, mentors, and classmates who will support your growth and help you explore new ideas. Through hands-on learning, research, internships, and experiential learning opportunities, you'll gain the skills and confidence to succeed in a rapidly changing world.

Leadership with Purpose

Leadership at Queen's is about more than holding a title. It's about developing the knowledge, creativity, and judgment to make a lasting difference. Whether you're leading a team, contributing to a research project, volunteering in the community, or launching a new idea, you'll have opportunities to grow as a leader throughout your university experience.

Part of Something Bigger

As a member of the Queen's community, you'll join a network that extends across Canada and around the world. You'll learn from diverse perspectives, build lifelong connections, and become part of a university committed to advancing knowledge, fostering belonging, and helping create a more sustainable and inclusive future.

Your Path to Career Success

Queen's University will prepare you for your future with the knowledge, connections, and real-world experience essential for career success.

- Gain valuable experience and transferable skills through experiential learning
- Connect with Queen's diverse and global alumni network for insider career advice
- Meet employers from hundreds of organizations at career fairs and campus events
- Fuel your future at Queen's Career Services, offering tailored workshops, internship opportunities, and networking events
- Receive support from Career Educators and Coaches who will help you:
 - Explore career and further education options
 - Write compelling resumes, cover letters, and applications
 - Prepare and practice for interviews
- Access dedicated career support and advising for international students

Bushra Areen *ArtSci'17* Beats the Heat

A combination of creativity and concern about the climate crisis, along with her Queen's honours degree in Global Development Studies, made Bushra the perfect candidate to take on a prior role as **Chief Heat Officer** in her home city of Dhaka, Bangladesh, a country that regularly experiences some of the continent's hottest temperatures.

Scan to read more about Bushra's journey to becoming a climate warrior.

The Internship Advantage

Queen's Undergraduate Internship Program (QUIP) is a great way to build your workplace skills and professional network in preparation for your post-graduation job search. QUIP internships are paid 12-16 month positions that allow you to explore a career path and learn about current practices, advances, and technologies in your field of interest.

You will gain

- Industry contacts to build your professional network
- Workplace experience and skills to enhance your resume
- Insights on what recruiters look for from new grads

Internship Examples

- Corporate Development Intern
- Events and Communications Coordinator
- Environmental Project Intern
- Mechanical Engineering Intern
- Business Analyst Intern
- Software Developer
- Patient and Provider Intern
- Laboratory Assistant
- Course and Program Development Intern
- 5G RAN System Developer

This opportunity is typically open to second- or third-year students.

Supporting You Every Step of the Way

From nurturing mental wellbeing to helping you find community and offering academic supports, we've got your back. Our extensive support network is dedicated to helping you meet challenges, achieve your goals, and make the most of your university experience.

Wellness Central

Safety on Campus

With programs like AMS Walkhome and Blue Light Emergency Phones, we're committed to creating a safe and supportive campus environment for every student.

Student Wellness Services (SWS)

We offer welcoming, confidential, and integrated programs and services that are responsive to your health and wellness needs.

Students can connect with a variety of healthcare providers within the **Côté Sharp Student Wellness Centre**. Services include booked appointments with physicians, nurse practitioners, nurses, mental health therapists, plus same-day clinics and therapy groups. We also refer to specialized care and can connect students with 24/7 online and phone-based resources.

Health Promotion offers wellness coaching appointments, as well as volunteer and work opportunities. Peer-led initiatives, such as food programs and therapy dogs, lead to students engaging in healthier lifestyle behaviours so they can be well and achieve their goals.

Alma Mater Society (AMS) Peer Support Centre

AMS Peer Support provides confidential, non-judgemental, and empathetic peer-based support for all undergraduate students, creating a comfortable environment through active listening, practical assistance, and resource referrals.

Empower Me

Empower Me is a confidential mental health and wellness service with phone, video, and in-person options, that's accessible 24/7.

queensu.ca/studentaffairs/resources/students

Find Your Community

Yellow House Student Centre for Equity and Inclusion

Yellow House is a welcoming space for students who identify as Queer, Trans, Black, Indigenous, and/or People of Colour, fostering community, empowerment, identity celebration, and growth in a safe environment.

Faith and Spiritual Life

Supported by Interfaith Chaplains, we offer multi-faith, non-judgemental support and create spaces and gatherings that are welcoming, peaceful, and safe.

Four Directions Indigenous Student Centre (4D)

Supporting Indigenous students, 4D is a home away from home where students gather to study, spend time together, and take part in cultural programming throughout the year.

Supports for Your Success

Student Experience Office (SEO)

Provides programs, support, and leadership opportunities to enrich your transition into and throughout university.

Student Academic Success Services

Access comprehensive support services to help you understand professors' expectations, manage your time, strengthen academic skills, and improve your writing — supporting your success from first year to graduation.

Queen's Student Accessibility Services (QSAS)

QSAS works collaboratively with students, instructors, and faculty departments to provide opportunities for students with disabilities to access academics through the provision of accommodations and/or engagement with learning services.

Your New Home

Queen's residences are a safe place to call home in your first year and a great place to make friends with students with diverse backgrounds, experiences, perspectives, values, and interests. While living in residence, you'll be invited to participate in a variety of social activities, cultural events, and educational programs.

You Are Guaranteed

A spot in a Queen's residence is guaranteed for all first-year international students who apply and whose deposit is received by the deadline.

Life in Residence

Our Residence Life Coordinators and live-in upper-year student Dons are dedicated to helping you form meaningful peer-to-peer connections and navigate the transition to university life.

Residence Roundup

From dinner with other students living on your floor to intramurals, game nights, and movie marathons — our residences are filled with a sense of togetherness, shared laughter, and meaningful moments ready for you to be part of.

Off-Campus Housing

Many resources are available to you to help find your off-campus housing, including Queen's Community Housing, the Off-Campus Living Advisor (OCLA), Homestay Network Canada, and Kingston Student Housing Co-op Rentals.

You Gotta Eat Here

Embark on a culinary journey with your mandatory Residence Meal Plan, granting access to three all-you-care-to-eat dining halls and several campus retail food locations serving fresh, globally inspired menus tailored to accommodate all dietary needs. Our registered dietitian and chefs are available to support you. Just 'Ask Before You Eat'.

Understanding Undergraduate Degrees in Canada

Students receive a high quality education that sets them up for future success.

In Canada, an undergraduate (bachelor's) degree typically takes three to four years to complete when studying full time. A bachelor's degree not only provides students with specialized knowledge in their chosen field, but also increases their career opportunities and earning potential after graduation.

What's the difference between a 3-year and a 4-year degree?

- A 3-year Bachelor's degree provides a strong academic foundation in a chosen field. While it can lead to employment, some advanced career paths or graduate programs may require additional qualifications.
- A 4-year Honours Bachelor's degree is the standard for students looking to pursue graduate studies (master's programs) or gain deeper expertise in their field.

Why Choose Canada for University?

In Canada, students are safe, supported, and receive a world-class education.

Here are some reasons students choose Canada:

Quality of Life

International students benefit from the same rights and freedoms that protect all Canadians. Canada is consistently ranked as one of the safest and most welcoming countries in the world.

High-Quality Education

Canada is known for offering high-quality education and research opportunities.

Inclusive Environment

Canada embraces diversity, creating a welcoming atmosphere for students from all backgrounds.

Employment Opportunities

While studying, students can gain professional experience through internships and part-time work. After graduation, they may be eligible for a Post-Graduation Work Permit (PGWP), which can open doors to a career in Canada.

Arts and Science

A degree that is as unique as you are! Arts and Science is where interests and passions connect, offering a place to explore ideas, gain new perspectives, and learn in a collaborative, curious community. Across the creative arts, humanities, and social and physical sciences, you'll build critical thinking skills, gain research experience, and prepare for what's next. Choose a three- or four-year degree aligned with your goals and future.

Arts *Bachelor of Arts (3-year option) or Honours (4-year option)*

Arts degrees span the social sciences, humanities, and creative arts, with opportunities to explore subjects from ancient humour and digital media production to global development studies and psychology. You'll build strong communication and analytical skills, discover diverse career pathways, and apply your learning through experiential and global opportunities that create meaningful impact in communities locally and around the world.

Science *Bachelor of Science (3-year option) or Honours (4-year option)*

Think like a scientist? Your Queen's Science degree, taught by leading researchers, will prepare you to formulate research questions, design experiments, collect and analyze data, and draw evidence-based conclusions. Through hands-on experience in labs and in the field, you will develop key skills for grappling with the problems of the future.

Exploring Arts and Science Options

With 30+ departments and schools, how do you choose your path? In your first year, you don't have to decide. You can explore courses across a wide range of subjects and discover what interests you. By the end of first year, you will choose the modular degree option that best suits you and begin your specialized path in Arts, Science, or a combination of both.

Your First Year in Arts and Science

First-year students will take five courses each term. These courses will be a mix of the area they are planning to specialize in and supporting courses for their major or areas of interest.

Enrol in some of the most interesting and popular courses in our faculty such as Development Studies in Global Perspective, Game Design, and much more!

**FOR THE
inquisitive minds
SEEKING TO
UNDERSTAND
THE WORLD**

Experiential Learning

Both our 12–16 month QUIP internships and 4-month summer Work Integrated Learning programs enable Arts and Science students to contribute meaningfully in professional settings, leveraging their analytical strengths, cross-disciplinary agility, and ability to navigate complexity.

Direct-Entry Programs

You can apply directly to Computing, Economics, Life Sciences, Kinesiology, or Music. Learn more on the following pages.

Customizable Science Pathways

Science is more than formulas and labs — it's a journey to understanding the world and preparing for the opportunities ahead. Whether you're interested in the environment, human behaviour, health, or data, these focus areas connect scientific discovery with the skills, knowledge, and experiences valued across today's emerging professions. Start in an area that reflects your interests and career aspirations, with the flexibility to explore new directions and build a foundation for future success.

How It Works

Choose Your Focus Area

Our admission pathways are competitive-entry streams designed for students with specific interests and goals. As you consider your options, apply to the pathways that appeal to you most and align with the areas you're most excited to pursue.

Stay Flexible

All first-year FAS courses are open to every student, regardless of the focus area. Take electives, pursue interdisciplinary projects, and explore new directions as your interests grow.

Build Real-World Skills

Gain hands-on experience through labs, fieldwork, and internships that connect learning to real opportunities.

Be Inspired by Discovery

Learn from leading researchers tackling real-world challenges through groundbreaking investigations and engage meaningfully with faculty who will inspire your curiosity, creativity, and future goals.

Popular Majors

Economics

Direct Entry Program

OUAC Code: QAE | *Bachelor of Arts, Honours in Economics (BAH)*

If you're curious about how markets, policy, and global systems shape everyday life, economics in Arts and Science offers a strong alternative to a traditional business-school path.

You'll build a solid grounding in economic theory while developing strong analytical and critical thinking skills, with the flexibility to combine economics with other areas that match your interests and career goals, such as Business and Market Strategy, Data Analytics and Finance, Global Issues and Policy, or Policy Design and Evaluation.

We prioritize the intellectual growth and development of our students. Our faculty members are actively engaged in research across various areas, consistently earning top rankings in Canada for the quality of their research output. By choosing Queen's Economics, you will develop the skills to analyze, understand, and solve the world's most pressing economic challenges.

Enhance your critical thinking with your Queen's Economics degree and get ready to take on a wide range of post-graduation opportunities.

Career Opportunities

- Trader
- Market researcher
- Portfolio Manager
- Client Services
- Human Resources Professional
- Risk Analyst

econ.queensu.ca

Computing

Direct Entry Program

OUAC Code: QD | *Bachelor of Computing, Honours (BCmpH)*

Computer science is one of the most exciting and diverse subjects of study today. Whether you're interested in fundamental computing, artificial intelligence, security, or software design, we can offer you a vast range of courses to fit your interests – and that's only scratching the surface.

Students in Queen's Computing are learning how to design, build, and improve the technologies that power our future. At Queen's, you don't just learn theory; you build real solutions, explore new technologies, and work on projects that reflect today's tech industry.

The skills you gain in Computing can lead to opportunities where you can:

- Design apps, websites, and software people use every day
- Work with data to solve problems and uncover insights
- Build and improve intelligent systems like AI tools
- Help protect systems and information from security threats
- Create your own ideas, products, or tech startups

Career Opportunities

Life Sciences and Biochemistry

Direct Entry Program

OUAC Code: QL

Bachelor of Science, Honours in Life Sciences (BSch)

Bachelor of Science, Honours in Biochemistry (BSch)

The Life Sciences and Biochemistry program is a direct-entry program with a shared first year. After the first year, students select either Life Sciences or Biochemistry for the remainder of their degree. Life Sciences spans core biomedical disciplines and themes like cardiovascular and respiratory sciences, drug development, toxicology, cancer biology and genetics, and neuroscience. Biochemistry explores life at the molecular level, emphasizing biomolecules, metabolism, and molecular biology. Both programs provide hands-on laboratory skills that prepare students for research, biotechnology, and health-related careers.

Career Opportunities

- Physician (Medical Doctor)
- Clinical Research Associate
- Biomedical Research Scientist
- Genetic Counsellor
- Biotechnologist
- Public Health Specialist
- Pharmacist

healthsci.queensu.ca/liscbchm/life_sciences

Mathematics

Mathematics is the cornerstone of modern scientific and technological fields and a fundamental, demanding, powerful, intellectual, and quite popular pursuit. By choosing Mathematics at Queen's, you are choosing to enhance your critical thinking, problem-solving and abstract analysis, while acquiring all the skills to go into whatever career path you wish.

Choose your specialization, major or minor in mathematics, pick your favourite specialization, take on unique internship opportunities, and confidently go into the workforce with your Queen's Mathematics degree.

Career Opportunities

- Statistician
- Economist
- Operations Analyst
- Accountant
- Financial Planner
- Data Scientist
- Research Analyst

queensu.ca/mathstat

Physics

By choosing Physics at Queen's, you're joining the very first Physics program ever established in Canada. Here, you'll have the unique opportunity to work alongside and learn from world-leading researchers in quantum optics, nanoscience, and nanophotonics, while also working on some exciting experiments focused on dark matter and neutrinos at SNOLAB.

The Department of Physics at Queen's is one of Canada's leading teaching and research institutes in Physics, Engineering Physics and Astronomy. Our faculty includes high-profile, world class physicists and astronomers like Nobel Laureate Dr. Arthur McDonald, and we have the largest research group in astronomy, astrophysics and astroparticle physics in North America.

Career Opportunities

- Professor
- Biophysicist
- Astronomer
- Systems Analyst
- Web Developer
- Meteorologist
- Chemical Technologist
- Environmental Scientist
- Clinical Technologist
- Geophysicist

queensu.ca/physics

Psychology

Psychology at Queen's will take your critical thinking to another level; you will be challenged with finding the answers to universal and societal behaviour driven questions such as: How do we learn? How do we communicate? How does stress affect us? Why do certain behaviours occur? Do we have free will?

You'll join internationally recognized research programs known for their outstanding faculty, students, and training integrity. These programs are celebrated for their innovative research and skills development opportunities. A degree in Psychology from Queen's is a great foundation for many career paths.

Career Opportunities

- Advertising
- Child and Youth Care
- Clinical Psychology
- Community Development
- Counselling
- Data Analysis
- Occupational Therapy
- Psychological Science
- Research
- Social Work
- Speech Language Pathology

Concurrent Education

Become a Queen's University Concurrent Education (ConEd) student and be part of a thriving student society, participate in an experiential learning placement to explore your interests, and learn from a passionate faculty that brings the most up-to-date education research into the classroom.

Fast-Track to Teaching Success

Our 5-year program prepares you to become an educator and qualify for the Ontario College of Teachers' certification.

Your First Year in Education

First-year students spend most of their time with the Faculty of Arts and Science taking five courses each term and one class with the Faculty of Education (PROF 110: Self as Teacher). In addition to this, students have a 60-hour placement in a non-traditional setting (EXLR 110: Experiences in Education Year 1).

Students in the Intermediate-Senior program option choose two of the following subjects:

- Dramatic Arts
- English
- First Nations, Métis, and Inuit Studies
- French as a Second Language
- Geography
- Health and Physical Education
- History
- Mathematics
- Music – Instrumental
- Music – Vocal
- Science – Biology
- Science – Chemistry
- Science – Physics
- Social Sciences

Direct-Entry Programs

While most Concurrent Education students choose their major in their second year, three direct-entry programs are available: ConEd French, ConEd Kinesiology, and ConEd Music.

Engineering

By choosing Smith Engineering at Queen's University, you will become part of an outstanding engineering community. Smith Engineering offers innovative programs and facilities, leading graduation rates, and a far-reaching alumni network.

Your First Year in Engineering

You will explore the different aspects of engineering in your first year. Courses include Introduction to Computer Programming, Physics, Chemistry, Calculus, Applied Engineering Mechanics, and more. Your Engineering Design and Practice course will have you working in small teams to solve a real-world engineering problem. Your first-year peers will be collaborators, part of a community where everyone is eager to help you succeed.

Multiple Pathways Available to You

Choose to enter Smith Engineering through the general first year or through our direct entry programs. The general stream is ideal for students who haven't decided yet which engineering discipline is best for them, and it guarantees discipline choice at the end of the first year. Select one of the direct entry pathways if you already know what choice is best for you. Learn more about these options on the next pages.

Career Exploration Through Internship

Our optional internship program is available in all our engineering programs, providing professional development and access to paid, 12–16 month internships that align with accreditation requirements. Internship experiences immerse you in long-term projects, help you develop industry connections and give you a head start on your career.

General First Year and Guaranteed Discipline Choice

OUAC Code: QE

In our General First Year program, you are guaranteed your choice from the list of 10 disciplines below with no cut-offs, limits, or quotas if you pass your first-year courses.

Chemical Engineering*

Learn to design, control, and optimize processes to generate products such as energy, materials, food, pharmaceuticals, and biomedical devices. You can work on any scale from micro-scale chemical reactions to mass manufacturing.

Civil Engineering*

Learn how to design, plan, and create our built world while protecting the natural environment. Civil engineering addresses the present challenges in environmental, geotechnical, hydrotechnical, and structural engineering including climate change.

Computer Engineering*

Computer engineers build the digital hardware and software systems that are needed in our modern information-driven world. You will design everything from computer chips to mobile computing devices to data centres to supercomputer systems.

Electrical Engineering*

Electrical engineers apply electromagnetic theory and advanced mathematics to design products ranging from nanoelectronics to communications systems, and robotics to electric vehicles and power generation.

Engineering Chemistry

The only program of its kind in North America, Engineering Chemistry graduates are accredited as both chartered chemists and professional engineers. Get a strong foundation in two disciplines, covering organic and inorganic chemistry, reactivity, structural determination, and molecular materials.

Engineering Physics

Combine practical engineering skills with deep scientific knowledge. Courses in quantum mechanics, laser optics, and nanotechnology will prepare you for an engineering career in leading technologies.

Geological Engineering

Combine core engineering fundamentals with broad geological knowledge. You will study physics, chemistry, applied mathematics, and natural processes such as earthquakes, volcanoes, plate tectonics, and mountain formation.

Mathematics and Engineering

You will learn to analyze and solve engineering problems requiring sophisticated mathematical skills, such as those involving modern communications, control, and mechatronic systems, as well as emerging areas such as artificial intelligence and data science.

Mechanical Engineering*

Mechanical engineers are needed wherever there are machines – including the human body. Your work covers design, manufacturing, testing, operation, and research. You can choose a general stream, or specialize in biomechanical or materials engineering.

Mining Engineering*

Explore the minerals industry and related environmental and technological fields. You will acquire a wide range of skills including locating, extracting, refining, and disposing of mineral and metal products and by-products – leading to a variety of dynamic career options in a truly global field.

Direct Entry Only

Mechatronics and Robotics Engineering

OUAC Code: QEM

The Mechatronics and Robotics Engineering program at Smith Engineering combines computer engineering, electrical engineering, and mechanical engineering. You'll learn to push the boundaries of intelligent autonomous systems and world-changing technologies, from industrial automation to robotics to autonomous vehicles. You can shape the program to your specific interests in your final year, specializing in automation, robotics, biomedical engineering, or intelligent systems.

A Mechatronics and Robotics Engineering degree will enhance your critical thinking and give you a robust skill set that you can successfully apply in the real world.

Explore upper-year specializations within your discipline

Every discipline has upper year specializations. Examples include:

- Aerospace Engineering
- Artificial Intelligence
- Biomedical Engineering
- Biomechanical Engineering
- Biotechnology
- Environmental Engineering
- Industrial Engineering
- Mechatronics
- Machine Learning
- Software Engineering
- and more!

Business

Bachelor of Commerce

Find your future in a place of possibilities. Earn Canada's premier undergraduate business degree from Smith School of Business, a top-ranked and internationally accredited business school.

Exceptional

A four-year honours degree covering business strategy and critical concepts taught by highly accomplished faculty, grounded in research and best practices. Eleven fields of study: accounting, business economics, digital technology, entrepreneurship, finance, general management, international business, management analytics, marketing, organizational behaviour, strategy and organizations.

Immersive

A vibrant, supportive community, with extensive activities and clubs. Easy access to faculty, academic advising and support, career planning, exchange prep, counsellors, wellness and accessibility services.

Personalized

Customize your experience with electives, minors, double degrees, certificates, and graduate diplomas. A dedicated career team prepares you with career planning, support for summer internships and on-campus recruiting by major firms. Consider a second degree from Queen's or accelerate to a business Master's.

Global

Learn alongside classmates from across Canada and around the world. An extraordinary term abroad expands your network and enhances career opportunities. 130+ partner schools and Smith's dedicated team support you. Earn two degrees via double degree options with prominent business schools in Europe and Asia.

Certificate in Business

A credential designed for non-business undergraduates. Take the Certificate in Business while earning your Queen's degree. Gain in-demand knowledge and stand out to employers.

Online and offered year-round to fit your schedule.

Core courses: finance, marketing, people management, and accounting. Plus, electives from: business strategy, global business, entrepreneurial thinking, and digital business.

smithqueens.com/cib

Health Sciences

Pursue your passion for health science in new and progressive ways at Queen's University. In the Health Sciences program, you will learn the core foundations of biomedical science and also have the opportunity to study health and disease through historical, societal, and global perspectives in a series of innovative courses and learning tracks.

Flexible Learning

Access interactive online modules prior to class where you will engage with classmates and teaching staff and apply your learning and course material in a real-world context.

Develop your own customized learning plan from a series of innovative health science and elective courses such as Anatomy of the Human Body, Foundations of Humanitarian Health Emergencies, an Antibiotic Resistance Lab course, and more.

Your First Year in Health Sciences

You will have the opportunity to take health science-specific courses right from the start, like anatomy, physiology, pharmacology, social and physical determinants of health, history and philosophy of health and healthcare, while also choosing to take more general courses such as chemistry, English, physics, psychology, and more.

Nursing

As a Nursing student at Queen's, you'll benefit from evidence-based teaching and practical experience in hospitals, public health clinics, and other community agencies. You will leverage our strong partnerships with local healthcare facilities, that will give you a wide range of clinical placement opportunities.

Success Starts Here

You will have access to our dedicated program academic advisors who will help you draw and define your path in the program. You will be part of our interprofessional learning approach, where nursing, rehab, and medical students learn together, reflecting the realities of our health systems.

Customize Your Degree

- Apply for research or simulation lab assistant positions
- Complete a Certificate in Business or Law
- Do a dual degree in Arts and Science

A degree in Nursing from Queen's will help you become a Registered Nurse and make a positive impact anywhere you work. When you become a Queen's nurse, you will be able to work all over the world in the following broader settings:

- Community organizations
- Hospitals
- Research
- Education
- Government

Graduate Studies and Professional Programs

School of Graduate Studies and Postdoctoral Affairs (SGSPA)

At Queen's, the School of Graduate Studies and Postdoctoral Affairs offers professional and research-focused Masters and Doctoral degrees as well as Graduate Diplomas that open doors to world-class mentorship, rigorous scholarship, and meaningful careers. Internationally recognized faculty provide dedicated supervision as students push boundaries and lead with purpose in state-of-the-art, interdisciplinary settings. International students are central to Queen's research mission, and dedicated funding, wellness support, and transition resources ensure every student has everything they need to transform their potential into lasting impact.

queensu.ca/grad-postdoc

School of Medicine

Our curriculum is designed to foster well-rounded physicians through academic excellence, equity, and hands-on clinical experience. In our medical education programs, you'll build personal connections, and establish relationships with regional partners for diverse clinical exposure. We encourage student involvement in curriculum development and governance. Our graduates not only succeed in obtaining postgraduate training but also actively contribute to their professions and communities.

meds.queensu.ca

Smith School of Business

The business school offers research-based MSc and PhD programs plus a suite of professional graduate degrees including MBAs and specialized degrees in analytics and AI, finance, international business, innovation and entrepreneurship, digital product management, and more.

smithqueens.com

Faculty of Law

Queen's Law is one of Canada's premier law schools, known for academic excellence, strong career outcomes, and a supportive community. Students can choose to explore legal topics in a 1-year Certificate in Law, providing valuable foundational knowledge. The Juris Doctor (JD) program is the next step in becoming a lawyer for students who have graduated from a 3+ year undergraduate program (90 credits) in any school of study. JD graduates can also write the bar exam in the U.S. states of New York and Massachusetts. Many students pursue a Graduate Diploma in Immigration and Citizenship Law to launch a career as an immigration professional. Queen's also offers graduate degree programs in Law, including the Master of Laws (LLM), a specialized Master's in Political and Legal Thought, and doctoral studies (PhD).

law.queensu.ca

English Language Bridging Program

QBridge – School of English

QBridge is an English language pathway to Queen's University for students who are academically competitive for admission to a Queen's undergraduate degree program but who do not meet the required admission standard for English language proficiency.

This pathway ensures that students are linguistically, academically, and culturally prepared to complete their Queen's undergraduate degree.

Eligible Degree Programs

Academically competitive applicants for Queen's undergraduate programs lacking English proficiency will be automatically evaluated for QBridge pathways. QBridge Accelerated is for all Main Campus programs, while QBridge EAP is for Arts, Science, Computing, and Engineering. See below for details.

Accelerated – July-August

An intensive eight-week summer course, QBridge Accelerated is for students with the following minimum standardized English language test scores:

TOEFL iBT: 4.0 overall	DUOLINGO: 95	IELTS: 6.0	Cambridge English: 170
PTE: 55	MELAB: 78	CAEL: 60	LanguageCert Academic: 65

Students must achieve a minimum grade of B in QBridge Accelerated to progress to their academic degree program beginning in September.

English for Academic Purposes (EAP) – Starts in September

Students who do not meet the requirements for QBridge Accelerated but are academically competitive for admission will be considered for QBridge EAP if they present the following minimum standardized language test scores:

TOEFL iBT: 3.5 overall	DUOLINGO: 80	IELTS: 5.5	Cambridge English: 160
PTE: 40	MELAB: 58	CAEL: 50	LanguageCert Academic: 60

Students must achieve a minimum of A- in EAP 140, or B in EAP 150 to fully progress to their academic degree program. Students in the upper levels may choose to enrol in one for-credit course. If a student has not reached the required standard, then further EAP courses will be required to progress to academic studies.

qsoe.educ.queensu.ca/programs/qbridge

"By taking the QBridge program, students have the opportunity to be familiar with both Queen's campus life and the local environment. Moreover, they are provided instruction on assignment format (paper, reports, and presentations). As a result, they will get tips and advice on academic expectation during undergraduate study."

J.Song

*Former QBridge Student and
Queen's University Graduate*

Graduated Entry A QUEEN'S EXCLUSIVE ADVANTAGE

While any upper-level QBridge students can earn university credits while completing their English studies, Queen's unique graduated entry pathway allows students to transition full-time to their undergraduate programs even if they fall a little short of meeting the grade needed to start full-time studies. Students are able to start with a reduced course-load and, at the same time, receive some English language support to ensure a smooth adjustment into full-time degree studies. Graduated entry includes 3 undergraduate courses, 3 hours of weekly English support, and no delays in starting degree studies.

Meet our International Students

Udita Chauhan

Psychology

“As a recent graduate of Queen's University, I've developed a strong interest in the intersection of mental health, workplace well-being, and cognitive science. Throughout my studies, I explored topics including memory, equity, and organizational behavior, which shaped both my academic perspective and personal values.”

Wennie Chen

Concurrent Education

“With every practicum—second year, third year—you get to practice, reflect, and keep going. That's the beauty of Con Ed. I went from being scared to speak to one Grade 4 student to teaching two courses a day, every day, to classes of 30-plus high school students.”

Pranav Velpandi

Mining Engineering

“My advice to new students is to get involved early and embrace every opportunity that comes your way. Some of my most meaningful experiences at Queen's came through student leadership. The friendships, mentorship, and sense of community I found here made Queen's feel like home, and helped me grow both personally and professionally.”

Interested in hearing firsthand from current international ambassadors about their Queen's experience?

SCAN TO
BOOK A CALL

Raisa Islam

Business

"I chose Queen's for the outstanding reputation of the Smith School of Business and its powerful alumni network. That decision has shaped everything, from rigorous academics to lifelong connections, giving me confidence, mentorship, and a clear direction in my studies and personal growth. Smith School of Business has completely transformed how I see my future."

Avery McStravick

Health Sciences

"Queen's Health Sciences prepared me for life after graduation by teaching me valuable skills for any workplace, including teamwork, time management, leadership, and important lab and research techniques for the health sciences field. Something I found especially valuable about the program is the opportunity to take a Life After Queen's course, which helped me plan my future, network with experts, and learn job application tips."

Jack

Nursing

"Like many international students, the unknown and uncertainty in life when first arriving here at Queens was quite a struggle. But thanks to the nursing faculty's always-ready help and support, now I see this campus as my welcoming new home, a perfect place to achieve my dreams as a nurse."

How to Apply

- 1 Apply online
queensu.ca/admission/applying/how-to-apply
- 2 **Add @queensu.ca as a safe sender**
Ensure you can receive our emails because that's predominantly how we will be communicating with you.
- 3 You will receive an acknowledgement email after you apply — please carefully review it for your required next steps.
- 4 Submit any supplementary information that we request
- 5 Monitor your application status

International applicants not applying to another Ontario University should use the Queen's International Application, and keep track of their checklist and application status.

qconnect.my.site.com/applicants/s/start-an-application

Supplementary Information

Admission to Queen's is highly competitive. We may consider Supplementary Information, including the Supplementary Application or Audition, in addition to your academic record when making admission decisions. Each applicant has a unique To-Do List detailing the specific requirements needed to complete their application. Please review your To-Do List and its due dates in your SOLUS Student Centre.

First-year applicants to Commerce, Nursing, and Health Sciences must submit a Supplementary Application. Upper-year applicants, such as transfer students, to Commerce and Health Sciences are also required to submit a Supplementary Application.

Please visit our website for the most up-to-date details on Supplementary Information:

queensu.ca/admission/applying/supplementary-application

**Application Deadline*

FEBRUARY 1, 2027

FOR COMMERCE, HEALTH
SCIENCES, AND NURSING

MARCH 1, 2027

FOR ALL OTHER FIRST-YEAR
FULL-TIME PROGRAMS

English Language Requirements

Applicants who meet one of the following criteria do not need to submit a test of facility in English:

- Completed an IB diploma (completion of SL English B is not sufficient) *or*
- Lived in a country where English is the acknowledged primary language for the most recent three years prior to beginning their university studies *or*
- Attended an educational institution full-time where the medium of instruction is English for the most recent three years prior to beginning their university studies

All other applicants must achieve a satisfactory score on one of the tests of facility in English listed below.

If you are in doubt about whether you meet our language requirements, submit an acceptable English language test score as soon as possible to be considered for both direct-entry and pathway admission options, and to avoid potential delays in the processing of your admission application.

Test	Minimum Score(s)
Canadian Academic English Language Assessment (CAEL)	Overall score of 70 with no band below 60
Duolingo English Test (DET)	Overall score of 120
International English Language Testing System (IELTS)	Score of 6.5 on Academic Module with no band below 6.0
Test of English as a Foreign Language (TOEFL) Institution Code: 0949	4.5 overall, with no skill lower than 4.0 88 overall, minimum 20 on Writing, Speaking, Reading and Listening (Before January 2026).
Pearson Test of English (PTE Academic)	Overall score of 60
Queen's School of English	Minimum of 80% (A-) at ESLA 140, or 73% (B) at ESLA 150
LanguageCert Academic	Minimum band score of 70 with no individual score below 65
Cambridge English	Minimum Score: 175, with no component below 170

For more testing options, please visit:

queensu.ca/admission/applicants/english-proficiency

Winter Entry

Queen's has the following programs available for students interested in beginning their studies in the Winter term (January):

- Bachelor of Arts (Honours and General)
- Bachelor of Science (Honours and General)
- Bachelor of Computing (Honours and General)
- Bachelor of Health Sciences (Honours)

Eligibility

Winter Entry is intended for international students entering a first-year full-time program. You are eligible if you satisfy the criteria below:

- You have recently graduated from a high school program in Canada or abroad *and*
- You have never attended a post-secondary institution *or*
- You have attempted no more than 24.0 units (or equivalent) at another accredited university or college and are not currently enrolled in fall-term courses

Check your admission requirements:

queensu.ca/admission/applying/admission-requirements

Key Dates	
June 1, 2026	Applications Open
September 30, 2026	Applications Close
October 15, 2026	Document Deadline Deadline for submitting Health Sciences Supplementary Application
January 4, 2027	First day of classes

Learn more about Winter Entry and apply:

Biology, Chemistry, English and Mathematics. Minimum English score of 4. (Predicted/final). Supplementary Application.

Admission Requirements

General Requirements	Ontario	American School System Advanced Placement (AP)
	The Ontario Secondary School Diploma (OSSD), and six 4U/4M courses. Students must have ENG4U plus five other 4U/4M courses. Students in francophone schools may offer EAE4U or FRA4U in place of ENG4U.	Grade 12 graduation with a minimum admission GPA of B- based on four senior level academic courses from an accredited high school. Queen's is Test-Optional. SAT/ACT results may be submitted, but are not required. A school profile is recommended. (College Board code 0949; ACT Institutional Code 5236).
Programs	Ontario	American School System Advanced Placement (AP)
Faculty of Arts and Science		
Arts (QA) Economics (QAE) Concurrent Education/Arts (QB) Concurrent Education/ Arts - French (QBF)	English 4U. Additional five required courses may be either 4U or 4M.	Grade 12 English (two terms).
Biology and Cognitive Sciences (QSB) Earth and Environmental Sciences (QSE) Concurrent Education/Science (QF)	English 4U, Calculus and Vectors 4U, plus two of Biology 4U, and Chemistry 4U, or Physics 4U. Additional two required courses may be 4U or 4M.	Grade 12 English (two terms). Four full-year courses in each of Mathematics and Science. One (preferably two) full-year courses in two of Biology, Chemistry or Physics.
Life Science and Biochemistry (QL)	English 4U, Calculus and Vectors 4U, Biology 4U, and Chemistry 4U. Additional two required courses may be 4U or 4M.	Grade 12 English (two terms). Four full-year courses in Mathematics and Science, one, (preferably two), full-year courses in Biology and Chemistry.
Physical and Chemical Sciences (QSP)	English 4U, Calculus and Vectors 4U, Chemistry 4U or Physics 4U. Additional three required courses may be 4U or 4M.	Grade 12 English (two terms). Four full-year courses in Mathematics and Science. One (preferably two) full-year courses in Chemistry or Physics.
Mathematics and Data Sciences (QSM)	English 4U and Calculus and Vectors 4U. Additional four required courses may be 4U or 4M.	Grade 12 English (two terms), four full-year courses in Mathematics. Calculus is recommended.

Ontario and International School Systems

India and CBSE/ISC	China	All Other International School Systems
All India Senior School Certificate (awarded by CBSE) or the Indian School Certificate (awarded by CISCE). Predicted final grades or Interim year 12 grades or Pre-Board exam results will be used for applicants currently attending secondary school. Final Class XII Board Exams will be used for secondary school graduates with no post-secondary attendance. CBSE applicants must submit their Roll Number, School Number, and Admit Card ID along with written consent for us to access their final Class XII exam results on the Board's website. CISCE applicants must submit their ISC UID Number and Index Number, along with written consent for us to access their final Class XII exam results on the Board's website.	High School Graduation Certificate. Students currently in High School will be required to submit their High School Graduation Examination results (HuiKao/Xuekao). For students who have graduated from High School, Gao Kao results are required. Both Gao Kao and Hui Kao results must be verified by the China Higher Education Student Information and Career Center (CHESICC), chsi.com.cn. Instructions are available here chsi.com.cn/en/pvr.	Normally, candidates who have achieved admission level for universities in their own countries are eligible for admission consideration. Since specific requirements cannot be established on a general basis, applicants will receive individual consideration. English is a required prerequisite for all programs unless it is not an official language of the country.
India and CBSE/ISC	China	All Other International School Systems
English at the Standard XII Level.	No prerequisite subjects.	Senior Level English.
English, Mathematics and two of Biology, Chemistry, or Physics at the Standard XII Level.	Senior III Level Mathematics and two of Biology, Chemistry or Physics.	Senior Level English, Mathematics, and two of Biology, Chemistry, or Physics.

How to Submit Documents

Queen's University will accept unofficial documents from applicants for use in evaluating an applicant for a **conditional** offer of admission. **All final transcripts must be sent from your school, governing body, or test centre.**

Results from a Test of Facility in English

These results must be sent directly from the testing centre to Queen's University. **Results submitted through any other channel will not be accepted.**

Test	Submission
IELTS	Share your results with "Queen's University - Undergraduate Admission" through IELTS
TOEFL	Queen's University's Institution Code is 0949
Duolingo, CAEL Pearson, Cambridge	Share your results with Queen's University

Transcripts and Other Academic Results

Preliminary Results

Preferred Submission Method

Preliminary results can be submitted by a student, counsellor, or agent via our Online Document Upload form.

Transcripts may also be mailed to
Queen's University,
Undergraduate Admission
and Recruitment
Gordon Hall, 74 Union Street
Kingston, Ontario, Canada
K7L 3N6

queensu.ca/admission/submitdocs

Final Transcripts

Final transcripts must come directly from your school, test centre or governing body.

Submitting your Final Transcript

How you submit your final transcript depends on the country where you are currently enrolled in school, or your school curriculum.

Curriculum	Send transcript from
CBSE	Students must submit their Roll Number, School Number, and Admit Card ID along with written consent for us to access their final Class XII exam results on the board's website.
CISCE	Students must submit their ISC UID Number and Index Number, along with written consent for us to access their final Class XII exam results on the board's website.
French Baccalaureate	Baccalauréat Général final results must be sent by your high school.
GCE A Levels	A Level Certifying Statement of Results must be sent directly from the Examination Board(s). We will also accept a copy of this document from your high school.
International Baccalaureate	Final IB results must be sent electronically by the IBO.
International (Other)	Directly from your high school or exam board
Ontario and British Columbia	Automatically sent via OUAC*
U.S/AP Diploma	Directly from your high school or Parchment.
WAEC	Direct via WAEC.
<i>* If you applied via Queen's International Application Portal or CommonApp, your documents will not be automatically sent via OUAC. Please contact your school to have them send your transcript direct to Queen's University. We can not receive documents via Naviance or CommonApp directly.</i>

Key Dates 2026-27

As soon as we have your complete application (i.e. all the items on your SOLUS To-Do List), we will begin to assess your file for an admission decision. We will start to make offers of admission in early December and will continue to make admission decisions until mid-May.

2026		
October	1	Application opens on the website.
2027		
February	1	Applications are due for first-year full-time programs in Commerce, Health Sciences, and Nursing.
	15	Deadline to submit the mandatory Supplementary Application for Commerce, Health Sciences, and Nursing. Recommended last date to submit current high school transcript, including list of second semester courses (where applicable). Current Ontario high school students' grades will automatically be forwarded by their high school.
March	1	Applications are due for all first-year full-time programs except Commerce, Health Sciences, and Nursing.
	31	Last day Queen's will accept documents in support of an application.
April	30	Queen's receives Ontario high school grades from the Ontario Universities' Application Centre (OUAC).
May	1	Deadline for response to offers of admission for students not attending an Ontario high school.*
	21	All admission decisions complete at Queen's and posted on SOLUS.
June	1	Deadline for response to offers of admission for students attending an Ontario high school. This is also the deadline for students receiving an offer after May 1.* Deadline for residence application and deposit. To be considered for a space in residence, you must complete your application and submit your deposit no later than June 1 at 4 pm, ET.
	15	Deadline for final grades and confirmation of OSSD for Ontario high school students.
August	1	Final transcript deadline for students not currently studying in an Ontario high school.
September	1	Final transcript deadline for students studying the GCE and CAPE curriculum.
* Check your offer correspondence carefully for your response deadline date.
