Life Science and Biochemistry Students:

For those of you who have been directly admitted to a Life Science or Biochemistry degree plan or plan to request a Life Science or Biochemistry degree plan at the end of first year, you will enroll in classes as follows. Make sure you select the sections labelled “Duncan McArthur” with lectures in the morning (with the exception of BCHM 102/PATH 120). These spaces have been reserved for you so you can study with your cohort and minimize timetable conflicts.

You need to take:

- BIOL 102 (fall), BIOL 103 (winter)
- CHEM 112 (full year)
- MATH 121 (full year)
- PHYS 115 (fall) *we recommend you take this class in first year but you can take it in upper years or online over a summer, if you prefer. If you don’t take it in first year, pick an elective course instead.
- CISC 151 (winter)
- BCHM 102 or PATH 120 (fall) *take this class on Main campus, the only section listed
- Free choice elective course (3.0 units) (winter) *select an elective that fits in your schedule around your other required courses.

You should have a total of 5 classes per term. Your mornings will be spent studying at Duncan McArthur Hall on West campus and your afternoons will be spent in labs and tutorials on main campus.

Remember!

- Register in both fall and winter term classes now.
- Double check to make sure you haven’t scheduled any classes at Duncan McArthur Hall and Main campus back-to-back (all other buildings are main campus). There is a 10-minute window to travel from one class to the other. This is ok for main campus but not for travel from West to Main (it’s about a 20 min walk).
- There are food outlets and study spaces at Duncan McArthur Hall in case you forget a grab a snack on the way or have some time between classes.

Science Students Interested in Pursuing a Science Plan Other Than Life Science or Biochemistry:

For those of you who have been admitted as a first year Science student interested in a Science plan that recommends you take 3 or more courses per term from this list below, select sections labelled “Duncan McArthur” with lectures in the morning if there is space. This will help to minimize timetable conflicts.

BIOL 102/103
CHEM 112
MATH 121
PHYS 115/116

You should have a total of 5 classes per term. Select the other courses you need (as recommended by Plan) around these.

Remember!

- Register in both fall and winter term classes now.
- Double check to make sure you haven’t scheduled any classes at Duncan McArthur Hall and Main campus back-to-back (all other buildings are main campus). There is a 10 minute window to travel from one class to the other. This is ok for main campus but not for travel from West to Main (it’s about a 20 min walk).
- There are food outlets and study spaces at Duncan McArthur Hall in case you forget a grab a snack on the way or have some time between classes.

If you are interested in a Science plan that recommends only 2 (or fewer) classes per term from the list above, you should choose sections offered on main campus (anything BUT Duncan McArthur Hall).
