General Organic Chemistry

13 hours/week

Course notes,
readings,
WileyPLUS,
assignments and
other activities

3 hours/week

Access to Virtual
Office Hours
(weekends,
workdays, after
work)

3 hours/week

Access to Virtual
Tutorials

2 hours/week

Virtual
Labs

"John Carran's CHEM281/285 are EXCELLENT examples of how an online course should be run. Organic chemistry is a very difficult topic for just about everyone, yet the prof and TAs were able to pull off regular online tutorials, office hours, and virtual labs. They had a heavily active discussion forum, and help was given within the hour of posting a question. It was the absolute best experience I had with an online course, ever." - Student Evaluation

24
hrs

Response time to
students' questions

8am-
midnight,
7 days a
week

Instructor and TA
availability to
respond to students
via Moodle forum

30

Limit to number of
students in each
virtual tutorial group
