

Peer assessment of group participation

Tags: blended learning, online learning, peer feedback

Method: fully online

Competencies: ability to reflect and evaluate peers' work, ability to reflect on one's own work

Technology: custom development using open resource [Moodle Dataform](#)

DESCRIPTION

This activity will enable you to provide (and receive) constructive feedback from your peers. When working in a group, your peer feedback about your performance is an important element that can help you close the gap between a specific learning goal and your performance.

In the following activity, each learner will receive a participation mark for their contribution to the **in-class group activities**. The mark will be based on a confidential evaluation of your other group members.

The marks of all student evaluators will be averaged across the **different sections** to yield a final mark **worth 5%**.

A condition to receive a mark on this activity is for you to submit participation marks for all your group members. Failing to do so will result in a partial or a zero mark for this activity.
