On the cutting edge of global health and disability, this study abroad program offers the opportunity for you as an upper-year student to ground your study of health and disability within the expanding context of global norms. Although this program is anchored in health studies, it is interdisciplinary in nature and you will explore different perspectives in order to broaden your scope and understanding of global health and disability studies. You will also have the opportunity to meet and network with representatives from world-renowned agencies, including governmental and non-governmental organizations specializing in health and disability, and discuss advancements in health, disability and policy with leading researchers, all providing exposure for internship possibilities.

Courses (9.0 units total)

HLTH 332/3.0 Foundations for Understanding Disability: A Health Perspective **or**
HLTH 402/3.0 Disability Studies: Issues, Research and Policy
HLTH 403/3.0 Global Perspectives of Community Based Rehabilitation
HLTH 404/3.0 Global Studies of Social Inclusion, Community Participation and Mental Illness

Courses in this program can be used to satisfy requirements for HLTH Major and Medial plans.

Global Perspective & Experiential Learning

Built into your tuition fees, the overnight field studies to Geneva, Lyon, Cambridge and London are outstanding, extended opportunities for you to visit important academic institutions and non-governmental organisations, and explore cultural and historical sites.
