FEATURING DR. CAROLYN DELOYDE *ON:*

Kingston In Focus: A data-driven decision-making tool that can support community planning.

**OPEN
TO
ALL**

**KINESIOLOGY
RM 106**

**THURSDAY,
SEPT. 21
2:30 - 4 PM**

Carolyn DeLoyde PhD, RPP, MCIP is an Adjunct Assistant Professor in the Department of Geography and Planning at Queen's University. Carolyn's research is focused on cities and the natural environment. Carolyn is a Registered Professional Planner (RPP) with 25 years of environmental and land use planning experience.

Dr. DeLoyde will be discussing her involvement with community partners to develop a data-driven decision-making tool that can be used to support community planning. Dr. DeLoyde will discuss how the University partnered with the City of Kingston and others in the community to collaboratively develop the Kingston In Focus dashboard. Dr. DeLoyde will also be discussing career options within the environmental field, drawing upon her 25+years of environmental planning experience.
