

# Graduate Student Positions Available

The Queen's Experimental Ecology and Ecotoxicology research group (<https://qe3research.ca/>) has two graduate positions starting in September 2019:

## PhD in Behavioural Ecotoxicology

Department of Biology (<https://biology.queensu.ca/>)

- Student will enroll in the PhD program in the Department of Biology
- Student will conduct research on the effects of petrochemicals on behaviour of aquatic vertebrates
- Research will be based at a new outdoor ecotoxicological facility at the Queen's University Biological Station
- Assets: knowledge of animal behaviour, aquatic ecology, and/or ecotoxicology; training in statistics; scientific writing skills
- Guaranteed stipend: \$24,300/yr

## MES in Contaminant Biogeochemistry

School of Environmental Studies (<https://www.queensu.ca/ensc/>)

- Student will enroll in the 20-month Master's of Environmental Studies program (6 courses and a report)
- Student will analyze an existing data set on the environmental fate of a contaminant in freshwater lakes
- Assets: interest in environmental chemistry, limnology, and/or ecotoxicology; training in statistics; scientific writing skills
- Guaranteed stipend: \$14,000/yr

To apply for a position, please send the following to Dr. Diane Orihel ([diane.orihel@queensu.ca](mailto:diane.orihel@queensu.ca)) by **January 15, 2019**: (i) cover letter stating your research interests and how they align with the mission of our research group, your reasons for pursuing a graduate degree, and your qualifications as they relate to the position; (ii) your curriculum vitae; (iii) university transcripts; and (iv) names/contact information for 3 references. Only short-listed applicants will be contacted for an interview.
