# GEOGRAPHY AND PLANNING WEEKLY

## Well Done, Rachel!

**Rachel Barber** (MPL graduate and incoming PhD student) recently published a sole-authored article entitled “[Aging in Place, Stranded in Space: An Analysis of Health Care Access via Public Transportation in Elliot Lake](#)” in *Applied Geography*. Huge congratulations!

## Belle Park Project Presents “Unearthed” August 26-30

**Unearthed** is a weeklong series of artistic installations, conversations, and experiments that seeks to reveal and imagine some of the stories of Belle Park.

Belle Park was built fifty years ago on a landfill that had previously been a wetland for thousands of years. From August 26-30, 2023, six artists will bring diverse perspectives to connect the history of the park with pressing contemporary social and environmental concerns. They will help us think about way-finding, home, identity, play, plants, and the land we stand on.

Artists Cheryl L’Hirondelle, Vince Ha, Noah Scheinman, Elyse Longair and Evalyn Parry will activate spaces in the park on various days throughout the week through music, geocaching activities, and temporary art installations. Information will be available on site at the times indicated below.

An exhibition at the Art and Media Lab in the Isabel Bader Centre will be running concurrently showing work by Jung-Ah Kim, Elyse Longair, and Vince Ha. Together, the art in the gallery and in the park seeks to suggest ways of engaging with a rich space with an uncertain future.

Please visit the [Unearthed website](#) to learn more about the event and view the complete schedule of activities.
