

## DR. MARK STOLLER IN GJOA HAVEN

The **Gjoa Haven Oral History Project** is a youth-oriented oral history program designed to facilitate intergenerational knowledge sharing between Inuit Elders and youth in Gjoa Haven, Nunavut. The project, led by **Mark Stoller** (Queen's) and **Jennifer Ullulaq** (Nattilik Heritage Society, Gjoa Haven), centres on the creation of a digital oral history archive featuring extensive interviews with local Elders and historical photographs of the community. Youth participants conduct, film, and edit the interviews, which are translated from Inuktitut with English subtitles. When completed, the archive will be included in the permanent collections at the Nattilik Heritage Centre. The project runs until 2025 and is supported by a SSHRC Insight Development Grant, the Government of Nunavut, the Kitikmeot Inuit Association, and the Nattilik Heritage Society.

The **Gjoa Haven Oral History Project** was recently featured on **APTN National News**. Click the screen to watch the video!

# SURP in *Plan Canada*

The latest edition of *Plan Canada* (the CIP's national professional journal) is a special issue on Smart Growth containing many contributions from Queen's alumni and faculty:

- The issue was co-edited by **Dr. Ray Tomalty**, Arts'79, MPA'88, who held a post-doc at SURP in the 1990s.
- The two lead articles were by **Professor Dave Gordon**, MPL'79 on the American origins of Smart Growth and its current status in Canada.
- **Natalie Pulcine**, MPL'17 was co-author of an article on the City of Ottawa's new 15-minute neighbourhood policies.
- **Eric Aderneck**, MPL'02 wrote the article on Industrial land and jobs.
- **Rachel Barber**, MPL'23 and **Professor Maxx Hartt** are co-authors on the need for "Smart Decline."
- Finally, **Pamela Sweet**, MPL'76 concludes the issue with reflections on whether regional planning is dead.
- The issue is further improved by photographs of **Nick Kuhl**, MPL'18 and **Steph Cantlay**, MPL'23 and **Alyssa Woods**, Artsci '21 accepting the CIP's Emerging Planner Award, Dillon Scholarship, and Adams Scholarship. 😊

SCIENCE

## ONLINE EVENT NOVEMBER 3: USING OER IN GIS TEACHING

The [IASSIST Geospatial Interest Group](#) will be hosting a web presentation/discussion on Friday, November 3, 2023, at 1:00 pm on the topic of how they are using Open Educational Resources (OER) and other shared materials in teaching. They'll also introduce [IMGIS](#), a shared repository of GIS-related teaching materials that is in development. The Geospatial Interest Group invites your participation and comments in the development of this resource.

[Register](#)  
[Here](#)

Do you have a favorite open resource? There will be time for sharing, so bring your favorite resources. These can be anything: websites, blogs, tutorials, books, courses, etc.

# More From Belle Park!

Take a moment to enjoy some more photos from this year's incoming class of geography graduate students, along with Professor Laura Jean Cameron, geophysicists Alex Braun and Jack Fitzgerald, Hilbert Buist of the Belle Island Caretakers, and Queen's Geospatial Librarian Francine Berish.
