Director’s Message:
SURP MOVES BACK TO THE FUTURE
Dave Gordon, MPL’79

The big news this Fall is that after 28 years in Sutherland Hall, the School moved into newly-renovated space in Mackintosh-Corry Hall. We have a dedicated classroom on Mac-Corry’s “main street”, adjacent to the GIS Lab, new departmental offices and the university’s latest high-tech classrooms. We have moved back to the future, since our “new” classroom is actually the same space where SURP students were taught from 1974 to 1989. But our older alumni will hardly recognize the space, since it is now equipped with all the latest teaching gear: computer projectors, wall-to-wall magnetic whiteboards, and moveable furniture that allows us to switch from discussion mode to group project in seconds. It is a moving experience to lead classes in the same space where Gerald Hodge, Mohammad Qadeer and Eric Thrift taught me.

The School’s new space reinforces its collaborative culture with a suite of faculty and student offices on the floor above the classroom, combined with project rooms and a new boardroom named after the late Professor Sue Hendler. The Hendler Room includes a library of all MPL theses and reports and a dedicated video conference system to allow remote job interviews, webinars, or interaction with our project sponsors in Ottawa and India.

In other School news, the MPL degree was re-accredited by the Professional Standards Board of the Canadian Institute of Planners. The long-running combined BSc/MPL combined degree program with Civil Engineering has been joined by other combined degrees with Environmental Studies, Geography and Health.
