

## **South Frontenac Museum Society**

*The South Frontenac Museum Society's Mission is to fascinate and educate residents and visitors by bringing our history and culture to life.* We would welcome an intern to work with our volunteer staff to help make this vision a reality. Currently we are interested in having a student to assist with research into our local mills and the industry that evolved with them. Our museum is located in an old schoolhouse on Road 38 in the village of Hartington about 20 minutes north of Kingston. The Museum is open seasonally through the summer, so it will not be open during this placement, though, we have Wi-Fi available onsite should you choose to work out of the museum or on a hybrid schedule. This is a placement that will allow you to take an active role in designing your tasks/projects with your interests and expertise in mind, with all the benefits and excitement of a small museum.

Requirements: reliable transportation to the museum if you choose to work onsite (20 minutes north of Kingston), as well as access to a computer and internet access.
