PREFACE

This supplementary bibliography is an extension up to the Spring of 1975 of the material included in the original publication in 1967 entitled, "Federalism and Intergovernmental Relations in Australia, Canada, the United States and Other Countries: A Bibliography". This was published by the Institute of Intergovernmental Relations at Queen's University.

As with the original work we make no claim that the compilation is complete. However, we have tried, as far as resources would permit, to include all publications which directly or indirectly are of interest to students in intergovernmental relations, excepting the area of international affairs.

The putting together of a bibliography is a highly subjective process since to a substantial extent one must rely on titles rather than on an examination of the work itself, if the project is ever to be completed. The volume of writing since 1967 has been considerable. Hence, in order to limit the size of the bibliography we have not attempted to provide coverage for the United States except in references to other bibliographical sources.

The classification may not always be as precise as one would wish nor the choice of material without fault. Nevertheless we think that the compilation is reasonably complete and should be of value to those whose interests encompass federalism and its intergovernmental relationships.

The completion of this supplementary bibliography was made possible through the kind cooperation of the Federal-Provincial and Interprovincial Affairs Secretariat, Office of Intergovernmental Affairs, Ministry of Treasury, Economics and Intergovernmental Affairs, Government of Ontario.
