

Teaching Assistant Positions – Academic Year 2026/27

All graduate students are invited to apply for a teaching assistantship in the Department of Mathematics and Statistics for the Fall and Winter terms of 2026/27. Teaching assistantships will be assigned following the [PSAC Local 901 Collective Agreement](#).

Notes:

- The following link provides a list of all courses which may be assigned a graduate TA:
[Course List 2026-27](#) (XLS)
- Courses with low final enrollment will not be assigned a TA. The cutoff is usually 15 students.
- Some instructors may opt not to use a TA.
- Instructors and enrollments are not final until September and January in the case of winter term courses.
- TA duties are broken down into four categories: student contact (running tutorials/labs and proctoring); term marking (assignments and quizzes throughout the term); exam marking (midyear and final exams at the end of term and after classes are over); and administrative support (preparing solutions, answering student emails; posting solutions, etc.) Not all courses will require all categories of work.

Students who may be registered in a graduate program in the Department of Mathematics and Statistics in the 2026-27 academic year, regardless of their group as noted in the collective agreement, will be emailed a link to a survey in which to indicate their teaching assistantship preferences.

External candidates should submit a curriculum vitae, transcripts, details on relevant experience as well as any other relevant materials the candidate wishes to submit for consideration (i.e., a teaching dossier or student evaluations, etc.) along with their course preferences, to Dr. Ping Li (pingli@queensu.ca).

The deadline for applying is Tuesday, June 30, 2026. Review of completed applications will begin after this date and continue until all positions are filled. The final appointments are subject to budgetary approval and regular staffing. Additional information about the Department of Mathematics and Statistics can be found at <https://www.queensu.ca/mathstat/>.

The University invites applications from all qualified individuals. Queen's University is committed to employment equity and diversity in the workplace and welcomes applications from women, visible minorities, aboriginal people, persons with disabilities, and persons of any sexual orientation or gender identity. All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority. Any questions can be directed to Dr. Ping Li (pingli@queensu.ca).
