Employment Rates: The employment rate is defined as the number of employed persons expressed as a *percentage* of the labour force where the labour force is those persons who were employed, or unemployed but looking for work. To determine employment rates of recent graduates, Ontario universities conducted a survey of all 2013 graduates of undergraduate degree programs. Graduates were asked questions regarding their employment situation six months and two years after graduation.

Graduation Rates: The MTCU has calculated graduation rates using a single entering cohort of students and determining whether or not they graduated within seven years. The methodology employed involves the selection of all new full-time, Year One undergraduate students on the official **Fall 2007** enrolment file, who have a valid (and unique) student ID number, and were seeking either a bachelors or first professional degree. The subset was then matched against the records for students who received a degree (in any program) from the same institution during the most current seven year period (**2007** to 2014).

NOTE: To ensure confidentiality, cell counts less-than or equal-to 5 are suppressed and displayed as "*". If one cell in a column is suppressed, the total is rounded to
