

“Foreign Perceptions of the United States under Donald Trump is a wonderfully comprehensive collection of eighteen well-documented articles on the way the outside world has perceived the 45th president of the United States. The controversial nature of Trump’s foreign policy is documented by great experts in the politics of different regions all over the globe. This book will be an invaluable source for courses on American politics (especially global policy) and for others interested in foreign affairs.”
—**Ilan Peleg**, Lafayette College

“This collection of essays is unusual—and valuable! To learn how the behavior of U.S. presidents affects the view of the United States around the globe, we usually have to rely on glib punditry. Now, with this book, we have smart, interesting, and well-informed essays from experts. The contributors bring to the task deep knowledge of specific countries and regions. It’s very instructive and widely informative. This volume sets a high standard, and I hope the effort is repeated in the future.”
—**John T. Woolley**, University of California Santa Barbara

Donald Trump and his administration radically altered many international policies and behaviors of the United States and changed the position of the United States on many international understandings, including environmental, trade, military, and human rights agreements. This book studies the effect of those actions, and Trump’s behavior, on the standing of the United States in the global community. Eighteen individual case studies examine traditional relationships between their countries and the United States prior to the Trump election. They address expectations about the outcome of the 2016 American election, and the immediate reaction to the election. They explore how responses to American policies varied in their country. And they explore how their nation’s relations with the United States changed over the Trump years.

The authors reflect on what was permanently lost or gained by the end of the Trump years and speculate on lasting consequences of Trump foreign policies and international behavior for America’s standing overseas.
