Queen’s University – Electricity Demand Management

Physical Plant Services will publish a forecast for Demand Management weekly when no reduction signals are present. If extreme weather and high provincial demand is present notification will be sent twice a week.

For more information please visit:

http://www.queensu.ca/sustainability/campus-initiatives/energy/demand-management

Protocol for Security  - (613) 533 6080 internal (36080)

If security receives phone calls regarding A/C issues in the affected buildings during hours highlighted below in red, there is no need to call a controls mechanic as they will be coordinating the shutdown. Please allow an additional 30–45 minutes after the shutdown hours for systems to restart and recover after the end of the response period.
