CURRICULUM VITAE

NAME: Roderick Cameron Lodge Lindsay

DATE OF BIRTH: 30 December, 1946

CITZENSHIP: Canadian

DEGREES

B.Sc. University of Toronto 1974
M.Sc. University of Alberta 1978
Ph.D. University of Alberta 1982

PROFESSIONAL ASSOCIATIONS

American Psychological Association
American Psychology - Law Society
Society for Applied Research in Memory and Cognition

EMPLOYMENT HISTORY

1996-present Professor, Department of Psychology, Queen's University
1986-1996 Associate Professor, Department of Psychology, Queen's University.
1982-1986 Assistant Professor, Dept. of Psychology, Queen's University.

RESEARCH INTERESTS

My graduate training was as a social psychologist working in the areas of aggression and attribution. Early on in my career I became interested in applying psychological research. In particular, I have an established research program in the psychology-law area investigating factors that influence the accuracy of eyewitness identifications and reports as well as the belief of eyewitness testimony. In recent years my studies have taken on a strong developmental flavour with work on identification procedures for use with children and explorations of courtroom procedures used with child witnesses. I continue to explore and develop procedures used by both police and the courts to obtain and evaluate eyewitness evidence.

HONOURS

2010 Award for Excellence in Graduate Student Supervision (Queen's University)
2004-2014 Queen's University Research Chair
2003 Keynote Speaker, Society of Applied Research in Memory And Cognition.
2002 Canadian Psychological Association career award for "Distinguished Contributions to the Application of Psychology"
1999-present Honourary Professor, Department of Psychology, University of Aberdeen

CONSULTING:

I have testified as an expert on eyewitness issues in both criminal and civil cases on three continents and consulted with individual police identification officers and departments re identification procedures. Three consulting experiences are particularly noteworthy.

Beginning in 2002, I provided training on eyewitness identification issues to Canadian judges through a program developed by the National Judicial Institute. These sessions are listed under workshops. By the end of 2004, I reached about 65% of the criminal court justices in Canada (outside of Quebec) through these programs.

As a member of the Technical Working Group for Eyewitness Evidence (U.S. National Institute of Justice), I participated in the development and writing of the American national guidelines for obtaining and preserving eyewitness evidence (published in 1999 as Eyewitness Evidence: A Guide for Law Enforcement). I continued to work as a member of the Technical Working Group for Eyewitness Evidence to develop training materials to accompany the guide (completed 2001, released 2002).

I consulted in one of the United Nations war crimes (genocide) trials for Rwanda. The UN prosecutors asked me to consult with them when the defence called an expert witness to testify. During June and July of 1998 I read e-mailed transcripts of the defence expert's testimony and provided comments and suggested questions for cross-examination. In September, 1998 I was called to testify in Arusha, Tanzania.
