COVID-19 Safety Procedures

Cleaning
- Increased handwashing/sanitizer use by both yourself and the researcher

- All surfaces are cleaned with medical-grade cleaner (e.g., cidex)

- A minimum of 2 hours will be scheduled between participants to allow for increased sanitation of high touch areas

Protective Equipment
- You will be provided with a surgical mask that you must wear throughout the study

- Researchers will be wearing personal protective equipment (surgical mask, face shield, gloves, gown) for the full duration of the study

Reduced Contact
- Access to the research site is limited and there are directional arrows within the building

- Physical distance will be maintained when possible

- Parts of the study will require the researcher to be closer than 2 meters from you. Protective equipment will be worn by the researcher at all times.

Symptom Screening
- We provide compensation by Interac e-transfer when possible to reduce contact

- Both you and the research team will complete a screening questionnaire of symptoms the day before your appointment and when you arrive for the study. Your appointment will be rescheduled if either you or the researchers report any symptoms or risk.
