Wednesday, 2:30 – 5:30 pm
Room: Craine 420
Aims and Learning Outcomes:
After successful completion of PSYC 360, students should be able to
a) summarize the behavioral, physiological, neurobiological characteristics and mechanisms of sleep in various species
b) summarize the evolution of sleep and critically discuss the potential functions of sleep
c) identify factors that affect sleep quality
e) apply methods to quantify sleep parameters and quality in humans
5. describe and discuss the nature of sleep disorders and their treatments.

Text: The required readings for the course consist of review articles and book chapters selected to complement the topics covered in the lectures. They are available on the Psyc 360 onQ web site.

Assessments:
Final exam: 40%
Lab Projects: 60%

Final exam: The exam will consist of short-answer and essay-type questions. Material from lectures, all laboratory sessions, and the required readings will be examined.

Laboratory Projects:
1. Completion of sleep diary and written laboratory report: “Factors influencing sleep quality in adults”. (25%)
2. Overnight sleep EEG recordings and construction of a sleep hypnogram; done in groups of 2-3 students. (15%)
3. Sleep Myths: Are current and popular conceptions about sleep more fact or fiction? Independent research project to critically evaluate a common idea, hypothesis, or widely accepted notion regarding sleep. You will present the results of your research to the class. (20%)

Details regarding the laboratories will be provided in the lab manual for each project.

Academic Integrity

Academic integrity is constituted by the five core fundamental values of honesty, trust, fairness, respect and responsibility (see http://www.academicintegrity.org/fundamental_values_project/index.php). These values are central to the building, nurturing and sustaining of an academic community in which all members of the community will thrive. Adherence to the values expressed through academic integrity forms a foundation for the "freedom of inquiry and exchange of ideas" essential to the intellectual life of the University (see the Senate Report on Principles and Priorities).

Students are responsible for familiarizing themselves with the regulations concerning academic integrity and for ensuring that their assignments conform to the principles of academic integrity. Information on academic integrity is available in the Arts and Science Calendar (see Academic Regulation 1), on the Arts and Science website (see http://www.queensu.ca/artsci/academics/academic-integrity), and from the instructor of this course.

Departures from academic integrity include plagiarism, use of unauthorized materials, facilitation, forgery and falsification, and are antithetical to the development of an academic community at Queen's. Given the seriousness of these matters, actions which contravene the regulation on academic integrity carry sanctions that can range from a warning or the loss of grades on an assignment to the failure of a course to a requirement to withdraw from the university.

Disability Accommodations Statement

“Queen's University is committed to achieving full accessibility for persons with disabilities. Part of this commitment includes arranging academic accommodations for students with disabilities to ensure they have an equitable opportunity to participate in all of their academic activities. If you are a student with a disability and think you may need accommodations, you are strongly encouraged to contact the Disability Services Office (DSO) and register as early as possible. For more information, including important deadlines, please visit the DSO website at: http://www.queensu.ca/hcds/ds/”
