### Required Text:

Petty, R. E., & Cacioppo, J. T. (1996). *Attitudes and persuasion: Classic and contemporary approaches*. Boulder, CO: Westview Press.

**Course Objectives:** This course is designed to provide students with an introduction to attitude and persuasion research. Particular attention will be given to reviewing the various theoretical perspectives that have been proposed as explanations for the psychological processes underlying persuasion.

**Format of Course:** This course will alternate between several weeks of lecture followed by one week of discussion. Each cycle of lectures will provide students with background information concerning various theoretical perspectives in attitude and persuasion research. Each discussion will focus on selected topics covered in the preceding lectures. There will be a total of eight weeks of lecture and four weeks of discussion.

**Class Discussions:** Each class discussion will focus on a theoretical perspective in attitude and persuasion research. The discussion will be conducted in a debate format with two teams of students (3 - 4 students each). One team will present a 15 minute presentation demonstrating the value of a particular theoretical perspective by outlining its conceptual/empirical merits and its potential application to real world issues. The other team will present a 15 minute presentation criticizing the theoretical perspective by illustrating its flaws and limitations or by presenting a competing theoretical perspective. Each team will then have 10 minutes to respond to the other team's presentation and ask questions of the other team. The class and the instructor will then have 15 minutes to ask questions of either team. In addition to participating in the discussions, team members will also be required to turn in a short essay (4-5 double spaced pages) outlining their personal position on the debate topic. This paper will be due the **same class session as the debate**. Each team will be required to participate in two debates during the term. Teams not participating in the debate will be required to formulate at least one question for the debate teams. These questions will be the basis of the participation mark in the course.

**Exams:** There will be two exams. These exams will be in the form of short answer and essay questions.

**Grading:**

- Midterm Exam (20%)
- Final Exam (30 %)
- First Essay (12%)
- Second Essay (12%)
- First Debate (10%)
- Second Debate (10%)
- Participation (6%)

**Statement on Academic Integrity:**

Academic Integrity is constituted by the five core fundamental values of honesty, trust, fairness, respect and responsibility (see [www.academicintegrity.org](http://www.academicintegrity.org)). These values are central to the building, nurturing and sustaining of an academic community in which all members of the community will thrive. Adherence to the values expressed through academic integrity forms a foundation for the "freedom of inquiry and exchange of ideas" essential to the intellectual life of the University (see the Senate Report on Principles and Priorities <http://www.queensu.ca/secretariat/policies/senateandtrustees/principlespriorities.html>).

Students are responsible for familiarizing themselves with the regulations concerning academic integrity and for ensuring that their assignments conform to the principles of academic integrity. Information on academic integrity is available in the Arts and Science Calendar (see Academic Regulation 1 <http://www.queensu.ca/artsci/academic-calendars/regulations/academic-regulations/regulation-1>), on the Arts and Science website (see <http://www.queensu.ca/artsci/academics/undergraduate/academic-integrity>), and from the instructor of this course. Departures from academic integrity include plagiarism, use of unauthorized materials, facilitation, forgery and falsification, and are antithetical to the development of an academic community at Queen's. Given the seriousness of these matters, actions which contravene the regulation on academic integrity carry sanctions that can range from a warning or the loss of grades on an assignment to the failure of a course to a requirement to withdraw from the university.
