Executive Summary

Statistics Canada has changed the way RDC activity levels are reported in the Program Manager's Report (PMR). As a consequence, the year-over-year table provided in previous reports (since 2012) cannot be updated. So, for this year's Annual Report, the following abridged comparison table was created.

Statistical Summary from STC Program Manager Reports, 2012 - 2015					
Queen's RDC	2012	2013	2014	2015	Source Table in Program Manager's Report
Average researchers per contract	2.5	1.8	1.9	2.1	Table 1a/ Table 1
Total active researchers	61.2	37.8	40.9	55.8	Table 1b/Table 4
Average active primary contracts	33.4	20.5	21.4	29.3	Table 1b/Table 4
Average Monthly Research Activity (adjusted Dyads)	159.4	103.4	114.3	150.3	Table 1a/ Table 1

These statistics indicate an increase in activity in the QRDC, in terms of numbers of researchers per contract, total active researchers, average active primary contracts, and average monthly research activity measured in dyads. Source tables are pre/post changes in the Program Manager's Report.

Administrative Developments

In late 2015 our Statistical Analyst, Bin Hu, moved to a new full-time, 1-year temporary position at the COOL RDC in Ottawa. She transitioned to this new position in July-August, 2015. A hiring process for a new Interim Statistical Analyst for the QRDC was initiated immediately.

Ultimately, Dong Shen, an Economics Graduate Student, was hired as Interim Statistical Analyst to replace Bin. The contract nature of this position limits the number of hours the Interim Analyst can work in a calendar year. Because Dong did not start working until late October, this restriction did not come into play in 2015.

A new Statistical Assistant, Zhe Yang, was hired in Jan/Feb 2015; his role in maintaining the schedule for the QRDC in 2015 was important – and will become even more important given limitations on how many hours Dong can work in 2016.

There was turnover in membership on the QRDC Advisory Committee, with a previous committee member, Kamin Peyrow, returning to replace Michael Kottelenberg as our Graduate Student representative. In addition, Yolande Chan, Associate VP Research, replaced Cynthia Fekken on the committee. Thanks to Michael and Cynthia for their service on the committee.

QRDC Website

QRDC website activity for the period, Jan 1 to Dec 31, 2015, is shown in the following table. Figures for 2014 and 2015 are fully comparable; figures for 2013 were collected differently, so caution should be used when comparing with these figures.

QRDC Web Page - Unique Visitors			
Tab	2013	2014	2015
homepage	962	621	480
data available	140	91	210
apply for access	110	63	91
Publications	256	451	380
events	623	421	510
blogs	311	245	338
Note: The ORION analytics 'widget' changed in early 2014, so use caution in comparing 2013 and 2014 statistics.			
<i>Source: ORION, hosts of the QRDC</i>			

There was a twofold increase in hits on the 'data available' page and a 44% increase in hits on the 'apply for access' page. These reflect interest in actually using the QRDC and may explain some of the increased activity in 2015.

IMPORTANT NOTICE ABOUT FUTURE OF QRDC WEBSITE:

As described in the section "**Criterion 8: Major Objectives and foreseeable challenges for next year**" ORION (Ontario Research and Innovation Optical Network) will stop providing us with web-hosting services as of 31 August, 2016. In the face of such short notice, QUL and the QRDC are in the challenging position of having to migrate web content and functionality to a new platform over the summer months. We will work with ORION and QUL to make this happen as smoothly and seamlessly as possible.

QRDC Teaching and Outreach

Academic Director

The QRDC was discussed and promoted in a variety of contexts during 2015 – in classes and seminars dealing with data and in reference discussions with students and researchers.

Queen's Faculty

Professor Vincent Pohl (*Queen's, Policy Studies*) taught a graduate-level methods course in the QRDC: **ECON 882 – Research Problems and Methodology**.

Professor Pohl left Queen's shortly after the end of this course, but before leaving was asked to provide feedback about the process and practice of teaching a course using the QRDC. His comments are summarized as part of the minutes of the June 15th, 2015 meeting of the Advisory Committee, which can be found at:

https://queensrdc.othree.ca/qrdc_advisory_committee_minutes

QRDC Security

Security is an ongoing focal point for the CRDCN. The swipe-card security system installed in 2014 has greatly simplified tracking and reporting for the Statistical Analyst. Further security protocols (*fingerprinting and credit checks of all QRDC researchers*) were to have been implemented in 2015, but these have been delayed until at the fourth quarter of 2016. As of May 2016, it was not clear if this timeline would be adhered to. Discussions at the last Academic Director's meeting in April indicated that the new government in Ottawa is looking at the possibility of revisiting the Statistics Act. Specifically, there has been some talk of rewriting the Statistics Act to avoid the need for researchers to have 'deemed employee' status before being approved to use the RDC Network.

Source of line 1 (completed projects) is the Program Manager (PM) report.

Source of # of publications (lines 2-9) is the CRDCN Researchers' Survey, supplied by the CRDCN Bibliography (<http://rdc-cdr.ca/statistics>) around mid-April (informal results), and formally around mid-May after RDCs have had time to look over the online bibliography.

Source of lines 10 and 11 (graduate courses) are from the RDC.

Source of line 12 (conference presentations) is the CRDCN Researchers' Survey, supplied in mid-May (formally; informal results will be supplied mid-April).

Source of lines 13 and 14 (conference organization, conference sessions, etc.) is the RDC.

Box 2a: Summary of Substantive Comments on Publications

There were 3 PhD theses and 10 MA theses generated in 2015, with 8 of these MA theses arising from the ECON course run in the QRDC. Presentations were part of the Department of Economics Seminar Series. In addition to these, there were 2 media mentions and 1 video in 2015.

Instructions: Source of information is the CRDCN Researchers' Survey.

Confidence and cognition: tracking the effects of skill development on post-secondary school choice and labour market outcomes -- Using the Youth in Transition Survey (YITS-A) we estimate a Roy model with a two dimensional latent factor structure to consider how both cognitive and non-cognitive skills influence endogenous schooling decisions and subsequent labour market outcomes in Canada. Our estimates indicate that non-cognitive skills play a role in determining income at age 25 that is on par with that of cognitive skills. Our analysis demonstrates that it is crucial to account for the dynamics in decision making since this demonstrates that the effect of cognitive skills on adult incomes arises by one increasing the likelihood of obtaining further education. Conditioning on the choice to complete a university degree, cognitive skills are found to play no additional role in determining earnings at age 25. In contrast, non-cognitive skills not only indirectly influence adult income through the channel of educational choice, but they are directly rewarded in the labour market. Last, evidence from policy simulations suggest that equal attention should be given to policies that cultivate different dimensions of non-cognitive skills as those that focus solely on cognitive skills.

Instructions: Please summarize the information provided by the CRDCN Researchers' Questionnaire.

Criterion 7: Summary of Major Achievements and Challenges for the past year (2015)

Achievements

- Hired new Interim Statistical Analyst
- Hired new Statistical Assistant
- Renewed membership of the QRDC Advisory Committee
- Contributed to major funding applications submitted by CRDCN (SSHRC/CIHR, CFI)
- Successful completion of Grad course taught in QRDC (ECON 882 – Research Problems and Methodology)
- Initiated purchase of new software for the QRDC (Matlab & toolboxes)
- Initiated research project in QRDC with Bin Hu, Statistical Analyst

Challenges

- Worked on QRDC/CRDCN funding issues to ensure ongoing operation of the QRDC and the broader network
- Continued monitoring of security regulations/requirements
- Continued advocacy for new and different data sources (e.g. Administrative data)

Criterion 8: Major Objectives and foreseeable Challenges for next year

Objectives

- Continue to support the CRDCN in its grant application efforts
- Continue to advocate for clarification of researchers' status under the Statistics Act (vis-à-vis security clearance)
- Complete active research project in QRDC (with Bin Hu, our Statistical Analyst who is currently seconded to the COOL RDC)

Challenges

- Work with Interim Statistical Analyst to find a Professor/Senior Graduate student prepared to teach a Graduate methods course using the QRDC – Winter 2017 timeframe.
- Adjust to staffing changes (status of Statistical Analyst position unknown at this time, but likely to change in 2016-17)
- In May 2016 the QRDC was contacted by ORION (Ontario Research and Innovation Optical Network), suppliers of the web hosting service for the QRDC website. They indicated that ORION would no longer be providing web hosting services and that the QRDC website would be shut down by the end of August 2016. Such short notice puts QUL and the QRDC in the challenging position of having to migrate web content and functionality to a new platform over the summer

months. We will work with ORION and QUL to make this happen as smoothly and seamlessly as possible.
