

Make Your Own

ROLLED-UP TRILOBITE

Make your own *Greenops* trilobite! Cut out this model and follow the instructions to see what a trilobite looked like when it needed to defend itself!

1. Cut out pattern (leaving strips between segments intact).
2. Fold along bottom edge (black line) of each segment.
3. Fold bottom edge (black line) of each segment to slightly overlap the segment below (to white dotted line), as indicated by each black arrow.
4. Your folded trilobite (with overlapping segments) will look something like this:

5. Flip over your folded trilobite (with segments still overlapping) and put a piece of tape on top of the accordion like folds, like this:

6. Your trilobite should automatically roll up as a real one would have done for protection!
7. Give your trilobite a little more shape by slightly folding down the sides of the head, thorax segments, and tail.
8. Your completed rolled-up (enrolled) trilobite should look something like this:

GIVE IT A NAME!

HELLO
my name is

Olivia
