

Shadows are made when something blocks the light, creating a dark shape on the ground or surface. The size and shape of the shadow depend on where the light is coming from and what the object looks like!

**Can you match these Spring objects with their shadows?**

Curious about how light and shadows work? Dive into our collection of fun and fascinating books all about light, shadows, and everything in between—available now at your local library! [www.kfpl.ca](http://www.kfpl.ca)
