	Ambidextrous
Vitruvian Man	
	Mona Lisa
Inventor	
	Artist
Renaissance	

Did you know Leonardo da Vinci, the amazing artist and inventor from long ago, had a super cool secret? He could do something most people can't - he could paint and write with BOTH hands! Yup that's right, Leonardo was ambidextrous, which means he could use both his left and right hands equally well.

But wait, there's more! Leonardo had another hidden skill, whenever he wrote in his sketchbooks, he did it backwards! Can you imagine writing everything in mirror image, so it looks like it's written in a secret code? That's exactly what Leonardo did! He wrote his notes and plans in reverse to keep them safe from anyone who might try to peek at his brilliant ideas.
