

Straw Rockets!

Shoot for the stars by assembling and designing your own mini rocket!

Things You'll Need:

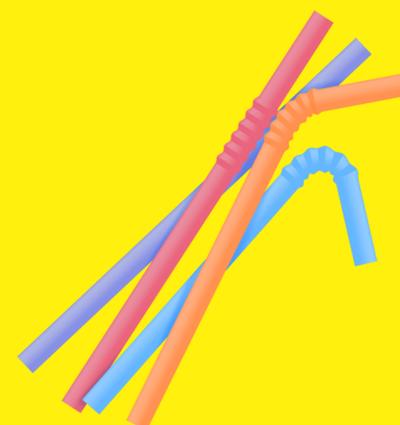

- A disposable straw
- A post-it note
- Tape

Optional Items:

- Decorations (pipe cleaners, googly eyes, etc)
- Extra post-its for fins
- Glue

Step 1: Assembly

Roll the post-it around the straw and tape down the edge to form a tube around the straw. Make sure the paper isn't rolled too tight! You want to be able to slide it up and down.

Step 2: Secure Payload

Slide the paper about a centimetre above the straw. Fold the top edge down and secure it with tape. Add your decorations here with glue or tape!

Step 3: Launch!

With your rocket on one end of the straw, blow the other end and watch your rocket take off!

How far can you make it go?
Can you add anything to make it go farther?
