

Count on UsSM
to put safety first

At Days Inn, you'll always find a clean, comfortable room and friendly staff all at the affordable rates you've come to expect.

Our **Count on UsSM** program focuses on further elevating health and safety best practices and protocols for everyone who works and stays at Days Inn.

Increased cleaning and disinfecting of high traffic areas, signage reinforcing physical distancing in public spaces and personal protective equipment (PPE) for all hotel team members are just a few key enhancements that will be visible during your stay.

As part of the Wyndham family hotels, we're proud supporters of the AHLA's Safe Stay program. The Safe Stay guidelines were created by an advisory council comprised of leaders from all segments of the hotel industry in accordance with CDC best practices.

With over 110 hotels from coast to coast, you can count on us to put your health and safety first. We look forward to welcoming your clients at one of our locations!
