Resources 4 Research Spotlight:
Increasing Your Research Visibility
With an ORCID iD

Ontario’s 45 publicly funded universities and colleges have strategic Mandate agreements for period 2017-2020 that:

“…encourage institutions to work with the government to help build a highly skilled workforce and also put an emphasis on collaboration and openness…” [emphasis added]

(Source: College and University Strategic Mandate Agreements, 2017-2020).
The premise

1. Opening up access to research works...and encouraging open methods and collaboration **can increase the effective sharing and use of research** and support wider participation in research

2. All of these possibilities are underpinned by digital technologies to facilitate the timely exchange of accurate information about...**the research AND its creator(s) / author(s)...**
The research community has lacked the ability to link researchers with all of their professional activities.

As a researcher, you want to

1. Ensure your work is discoverable and connected to you;
2. Minimize the time on data entry; and
3. Eliminate name ambiguity and ensure proper attribution
